

# Gas control on the next level

# Gas supply equipment for ultra high purity gases from grade 6.0

## Gas cabinets with control system

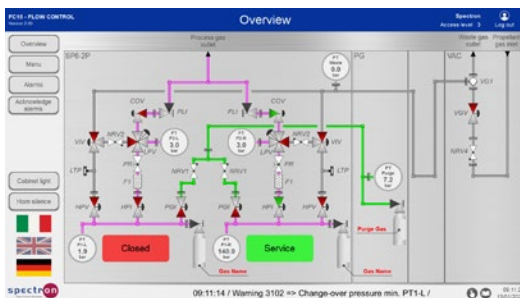

- Complete solution with fully automatic controller
- Entire production (valves, regulators, PLC, cabinet) is in house
- Clear design of gas lines
- At-a-glance status indicators

## Gas withdrawal units

- Flexible configuration incl. pressure regulators with tied diaphragm, valves, filters, gauges and purge devices

## Safety controller (PLC)

- A revolutionary menu-driven touch screen display is ergonomically designed into the front panel of the gas cabinet

## Advantages for you

- Professional and safe handling of ultra-high-purity gases
- Dead space optimized for max. cleanliness, precision and reliability
- Patented purging devices and fully automatic purge sequences
- Professional and safe handling of gases by monitoring and controlling the processes and applications such as automatic switchover by weight or pressure
- Acc. to SEMI specifications
